

ABSTRACT

A phthalocyanine composite with high sensitivity and low environmental dependence is provided.

5 It comprises both a at least one phthalocyanine compound expressed by general formula (1) and a at least one phthalocyanine compound expressed by general formula (2):

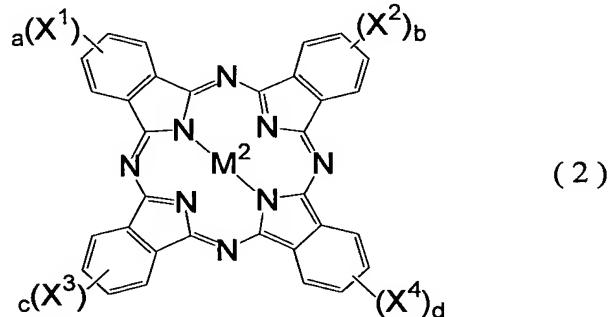

[Chemical Formula 1]

(1)

10

[Chemical Formula 2]

(2)

where, in the general formulae (1) and (2),

15 M¹ represents at least one arbitrary atom or atomic group that is capable of binding to a phthalocyanine,

M² represents an atom, or an atomic group containing an atom, selected from the second and

subsequent periods of the periodic table and capable of binding to a phthalocyanine, M¹ and M² being different in kind from each other,

X¹-X⁴ represent, independently of each other, a halogen atom, and

a, b, c, and d represent, independently of each other, an integer between 0 and 4 and satisfy

$$a+b+c+d > 1.$$
